

Umid Rza

FullStack Developer

umidrza4@gmail.com • [+994 60 410 03 01](tel:+994604100301)

<https://linkedin.com/in/umidrza> • <https://github.com/umidrza>

Summary

Full-stack developer with hands-on experience building scalable web applications using **C#, JavaScript, Python**, and modern frameworks like **React, ASP.NET Core, Django, and Node.js**. Skilled in developing end-to-end solutions, including responsive frontend interfaces and robust backend APIs. Strong understanding of database design, system architecture, and performance optimization across **PostgreSQL, MongoDB, and MySQL**. Experienced in delivering production-ready features, improving system efficiency, and collaborating across teams in fast-paced development environments.

Skills

ASP.NET Core • Node.js • Django • PostgreSQL • MongoDB • TypeScript • Docker Compose • React Native

Work Experience

.Net Developer

May 2026 – Aug 2026 • 3 mos

Codveda Technologies • Internship

Remote

- Developed ASP.NET Core MVC applications using Razor Views, Entity Framework Core, Dependency Injection, and middleware.
- Implemented JWT, OAuth 2.0, and OpenID Connect authentication with role-based and claims-based authorization.
- Built distributed microservices using .NET, RabbitMQ, Docker, and API Gateway patterns.
- Applied Clean Architecture, SOLID principles, and asynchronous programming to build scalable, maintainable, and high-performance applications.

Full Stack Developer

Dec 2025 – Jul 2026 • 7 mos

Houston Inc. • Internship

Remote

- Completed an intensive full-stack web development focused on modern JavaScript technologies
- Built applications using React and TypeScript, improving component design and state management
- Designed and consumed APIs using GraphQL and REST
- Utilized Docker for containerization and environment consistency
- Applied testing practices, including unit, integration, and end-to-end (E2E) testing, to ensure code quality and reliability
- Strengthened problem-solving and debugging skills through hands-on projects

Backend Developer

Nov 2024 – Oct 2025 • 11 mos

Printly • Full-time

Remote

- Developed and maintained RESTful APIs for Printly, supporting high-traffic applications and improving system scalability and reliability.
- Designed and implemented secure authentication and authorization using JWT and role-based access control.
- Built and optimized API endpoints for managing print orders, products, customers, and workflows.
- Collaborated with frontend developers to define API contracts and ensure seamless integration.
- Managed deployments and environment configurations across development, staging, and production environments.
- Worked with PostgreSQL to design efficient database schemas and optimize data access patterns.

Backend Developer

Sep 2024 – Dec 2024 • 3 mos

AI Lawyer • Freelance

Remote

- Built and optimized a high-performance C#/.NET RESTful API for AI Lawyer, improving system reliability and reducing latency by ~25%.
- Implemented secure authentication and authorization mechanisms (e.g., JWT, role-based access control), strengthening data protection and ensuring compliance with security best practices.
- Integrated AI/LLM services with backend systems, enabling seamless processing of legal queries and document analysis.
- Collaborated with frontend to define API contracts, ensuring reliable communication across distributed services.

Full Stack Developer

Feb 2024 – Sep 2024 • 7 mos

Coders Azerbaijan • Internship

Nakhchivan, Azerbaijan

- Developed and implemented full-stack solutions using JavaScript, React, and Python for dynamic web applications.
- Built responsive frontend components and integrated backend services.
- Maintained Git-based version control and contributed to collaborative team projects.
- Designed and managed databases, including data modeling and CRUD operations
- Implemented RESTful APIs for data communication between client and server

Projects

Blogs

Mar 2026 – Apr 2026 • 1 mo

Technologies: Node.js • React • MongoDB • Playwright

- Developed a full-stack blogging platform with React frontend and Node.js backend
- Implemented modern React patterns (hooks, component-based architecture) for scalable UI development
- Wrote end-to-end tests using Playwright to ensure reliability of core user flows
- Debugged and resolved application issues to maintain stable performance

NFTs Art

Jul 2023 – Sep 2023 • 2 mos

Technologies: C# • ASP.NET Core • Blazor • HTML/CSS • Microsoft SQL Server

- Built a full-stack NFT marketplace with secure RESTful APIs and responsive UI
- Implemented authentication, authorization, and role-based access control
- Developed CRUD operations for collections, including pagination and structured API responses
- Designed scalable backend architecture with focus on maintainability and clean code

Education

Bachelor's degree: Geomatics Engineering

Sep 2018 – May 2022 • 3 yrs 8 mos

Nakhchivan State University

Azerbaijan

Languages

English (Full professional proficiency)

Turkish (Professional working proficiency)

Azerbaijani (Native or bilingual proficiency)
